# Make Your Own Mixes

Here they are—more than a hundred recipes for the mixes and seasoning packets that fill our grocery carts and pantries, on which we depend heavily to make quick meals at home. With these mixes in your pantry, refrigerator and freezer, you'll have at your fingertips all the things you need to make quick and easy meals.

So, you may be wondering, why not just buy salad dressings, taco seasonings, baking mixes and little boxes of pudding mix the way you always have? Three reasons: Health, time and money.

**Health:** Reading the list of ingredients on the typical convenience packet of seasoning mix or other prepared food product can be confusing if not shocking. Many of these convenience products contain MSG, hydrolyzed vegetable protein, dioxides and any number of unpronounceable items. One advantage of making your own mixes is that you will know exactly what's in them. Making your own mixes and seasonings allows you to limit table salt, MSG and other harmful ingredients from your diet.

**Time:** With your own mixes all ready to go, you'll cut the time it takes to prepare meals. You'll find yourself preparing several meals at a time. You'll be able to fix the right amount for each meal, even when you have little time. And you'll cut out last minute trips to the store because you will have convenience mixes in your pantry, refrigerator and freezer.

**Money:** The seasoning packets and mixes available in supermarkets are advertised as time-savers, certainly not money-savers. For example, a simple packet of Taco Seasoning containing 1.25 ounce of product, works out to more than \$26 a pound. And you can easily make it yourself for a fraction of the cost. That means more money in your wallet. The average to make the mixes in this booklet is less than half the cost of commercial mixes.

**General.** The recipes are presented with the assumption that the reader has a good understanding of basic kitchen techniques.

**Larger quantities.** Some recipes in this booklet are given in single-use quantities, while others yield enough mix for multiple uses. Our experience is that these recipes multiply well.

**Storage of mixes.** You will soon read that most of these mixes need to be kept in an airtight container. An airtight container is one with a tightly fitting lid, like Snapware or Tupperware, where the lid locks in place. Or a

screw-type jar or other container that has a jar lid that can be applied easily. A zip-type plastic bag creates an airtight container, as does a 6-inch square piece of foil when it is folded and the edges folded over sufficiently to create a seal.

**Sources for spices.** Stores like Whole Foods and Sprouts Farmer's Market and many others sell spices in bulk at reasonable rates. Check the international aisle of your supermarket for lower priced spices, particularly "It's Delish" brand. Surprisingly, the best deals online can be found at eBay. For example, a pound of onion powder is available for \$.28 an ounce, including shipping, as opposed to \$1.67 per ounce in the typical supermarket. Vanilla beans are a steal at eBay as compared to the supermarket and other local sources. Look for "refill" quantities, which typically are sold by the pound.

**Notes.** Most of the ingredients called out in the recipes in this booklet will be common pantry items, most of which you will have on hand. You may, however, come across a few that beg for further explanation.

**Lavender.** Both fresh and dried, lavender has come into vogue as a culinary ingredient. The *herbes de Provence* combination of lavender, thyme, rosemary and savory has been popular around France for a long time, but a more recent addition to American cuisine. Because lavender is a popular crafter's item, it is important to make sure that flowers you purchase for cooking have been grown for that purpose. It may be labeled as "culinary lavender" or "food grade." Or, grow your own. Lavender will make a lovely addition to your landscape.

**Summer savory.** This is a fairly popular herb, which may not be stocked in your supermarket. Check specialty stores, especially stores that carry bulk herbs and spices. Or, grow your own.

**Instant flour.** A low-protein, pregelatinized wheat flour to which some malted barley flour has been added, instant flour has been formulated to dissolve quickly in either hot or cold liquids. It is most often called for to thicken gravies and sauces. The leading brand available commercially is Wondra Flour by Gold Medal.

**Salt.** Ordinary table salt (sodium chloride) is a man-made product containing over 30 synthetic chemicals such as sodium aluminate and potassium iodide, added to make it flow easily from the box. Chlorine bleach is used to make it white, and has been found to be harmful, causing high blood pressure and fluid retention. Sea salt, on the other hand, is a natural product and contains no synthetic materials. It is

---

pure sodium, which our bodies require. A bit more expensive than table salt, sea salt is well worth the additional cost. For this reason all of the recipes in the booklet use sea salt.

**How to store spices.** Light, heat and humidity are the enemies of spices. Little glass jars stored close to your cooktop are the worst place to keep spices. Much better: Keep spices in airtight containers or spooned into a 6-inch square of aluminum foil folded to make airtight, stored in the freezer. Stored properly, spices will retain their pungency for 3 to 5 years.

**Shelf life.** Unless otherwise noted, assume that the mixes in this booklet will be at their peak of goodness for 6 months. After that time, some mixes may lose some of their flavor or the texture may change slightly. However, after this time these products will not become toxic, lethal or in any way a health danger. You may discover that some mixes will remain useful for longer than six months, depending on the environment in which they are stored. Dry mixes are best stored in a cool, dark place in an airtight container.

## Dump Chicken

It's called "Dump Chicken" because you dump the mix (see below) into a 1-gallon freezer bag with the chicken and freeze it. Then when you want to eat it, thaw overnight in the refrigerator and dump it into a pan and cook it.

The following recipes can be made with any 4 to 8 pieces of chicken, bone-in or boneless, skin-on or skinless, even whole. Experiment to see what you prefer. Simply mix the sauce ingredients, add to the bag with the chicken, seal and freeze.

**To use:** Thaw the bag overnight in the refrigerator. Pour the contents of the bag into a 9x12-inch pan and bake at 350F until done. Chicken breasts take about 25-35 minutes. Dark meat pieces will take longer.

*[According to the USDA it is safe to RE-freeze chicken IF it was thawed properly in the refrigerator, however, there may be a loss of quality due to the moisture lost through defrosting.]*

**NEW! Lemon Garlic Chicken:** 2 cloves garlic, chopped, 4 tablespoons olive oil, 2 tablespoons chopped parsley, 2 tablespoons lemon juice, 1/2 teaspoon salt, 1/8 teaspoon pepper, 4-6 chicken breasts.

**NEW! Garlic Dijon Chicken.** 2 cloves garlic minced, 1/2 teaspoon salt, 1/2 teaspoon pepper, 4 tablespoons Dijon Mustard, 2 tablespoons lime juice (or lemon juice), 4-6 chicken breasts.

**NEW! Spicy Sweet Chicken.** 2 teaspoons minced garlic, 2/3 cup apricot preserves, 1/3 cup soy sauce, 1/3 cup ketchup, 1 teaspoon Tabasco sauce, 4-6 chicken breasts.

**Russian Chicken:** 2/3 cup apricot preserves, 16 ounces Russian dressing, 2 packages dry onion soup mix.

**Teriyaki Chicken:** 1 clove garlic, crushed, 1/3 cup soy sauce, 2 tablespoons rice wine, 1 1/2 tablespoons cider vinegar, 1 1/2 tablespoons brown sugar, 1 1/2 tablespoons minced ginger.

**Spiced Citrus Chicken:** 2 tablespoons olive oil, 2 tablespoons lime juice, 2 tablespoons orange juice, 2 tablespoons lemon juice, 2 tablespoons chili powder, 2 tablespoons paprika, 1 teaspoon cayenne, 1/2 teaspoon black ground pepper, 1/2 teaspoon seasoning salt.

**Spicy Sweet Glazed Chicken:** 2 teaspoons minced garlic, 2/3 cup apricot preserves, 1/3 cup soy sauce, 1/3 cup ketchup, 1 teaspoon Tabasco.

**Sticky Chicken:** 2 tablespoons oil, 1 tablespoon soy sauce, 3 tablespoons ketchup, 3 tablespoons smooth peanut butter.

## Master Cake Mix

- 7 1/2 cups sifted all-purpose flour
- 1 tablespoon sea salt
- 4 1/2 cups granulated sugar
- 2 tablespoons double acting baking powder
- 3/4 cup cold butter

In very large bowl, combine flour, salt, sugar and baking powder. Mix well to blend. Cut the butter into small pieces and place in food processor bowl along with 2 cups of the flour mixture. Cover and process until mixture is very fine. Make sure that the butter is evenly distributed in the flour mixture. If it isn't, your cakes will have uneven texture and each will turn out differently. Add to remaining flour mixture and mix well using a wire whisk.

Divide the cake mix into three equal portions (about 4 cups each) by lightly scooping the mix into measuring cups and leveling off with the back of a knife. Place each portion into a quart glass jar or heavy duty zip-type plastic bags. Cover tightly and store in the refrigerator for up to a month, or in the freezer for up to three months. Each portion of cake mix will make two 8-inch cakes or one 13x9-inch cake.

Note: Make sure you measure the flour correctly for this recipe. Do not scoop flour using a measuring cup. Spoon the flour into the measuring cup from the bag. Also make sure

that you follow the directions, including beating times, to the letter. The gluten in the flour has to develop a bit to form the cake's structure. And the butter needs to be dissolved in the batter for the best texture.

**Yellow Cake:** Preheat oven to 350F. Prepare two 8-inch round cakes pans or one 13x9-inch pan with nonstick spray or grease and flour. Pour one portion of the cake mix (about 4 cups) into a large bowl. Add 2 teaspoons vanilla extract, 1/2 cup oil, 3 eggs, and 1 cup milk. Beat mixture 1 minute with electric mixer at low speed until blended. Scrape sides and bottom of bowl and beat 2 minutes longer at medium speed until batter is smooth.

Pour into prepared pans and bake the layer cakes at 350F for 20-30 minutes, or until cake springs back when pressed lightly in center and begins to pull away from edges of pan. Bake the 9x13-inch cake for 25-35 minutes until the cake tests done.

**White Cake:** Follow instructions above for Yellow Cake, substituting 4 egg whites for the 3 eggs.

6 tablespoons baking powder  
2 tablespoons baking soda

## Chocolate Chip Butterscotch Cookie Mix

9 cups all-purpose flour

4 teaspoons baking soda

2 teaspoons sea salt

3 cups packed brown sugar

3 cups granulated sugar

4 cups shortening

8 cups semisweet chocolate chips

4 cups butterscotch chips

In a very large bowl, stir together flour, baking soda, salt, and sugars. Add the shortening and stir until mixture is mealy. Lightly stir in chocolate chips and butterscotch chips until they are distributed evenly. Mix can be stored in an airtight container for about 3 months. Yield: 24 cups mix.

**To use:** Preheat oven to 375F. In a large bowl, beat 2 eggs and 1 teaspoon vanilla extract until well blended. Add 4 cups of cookie mix and stir to combine. Drop by teaspoonfuls onto cookie sheet and bake for 10 to 12 minutes. Yield: 2 dozen cookies.

## Brownie Mix

6 cups all-purpose flour  
4 teaspoons baking powder  
4 teaspoons sea salt  
8 cups granulated sugar  
1 cup unsweetened cocoa

In a large bowl, combine all ingredients and stir with a wire whisk to break up all lumps until evenly distributed. Store in an airtight container in a cool, dry place. Use within 3 months. Yield: 15 cups mix.

**To use:** Preheat to 350F. Grease and flour an 8-inch square pan. In a medium bowl place 1/4 cup melted butter, 2 beaten eggs, 1 teaspoon vanilla extract and 2 1/4 cups Brownie Mix. Beat until smooth. Stir in 1/2 cup chopped nuts. Pour into prepared pan. Bake 30 to 35 min-

utes, until edges begin to separate from the pan. Cut into 2-inch bars when cool. Yield: 16 brownies.

## Freezer Pie-Crust Mix

6 cups all-purpose flour  
2 teaspoons sea salt  
1 pound vegetable shortening  
(2 1/3 cups)  
1 1/4 to 1 1/2 cups cold water

Cut seven 12-inch squares of plastic wrap and heavy-duty foil and set aside. In a bowl, combine flour and salt. With pastry blender or heavy-duty mixer, cut in shortening until mixture resembles cornmeal in texture. Add 1 1/4 cups water all at once. Mix lightly with a fork, until water is absorbed and mixture forms a ball. Add additional water as necessary.

Divide dough into 7 portions. Shape into balls. Flatten each ball slightly. Wrap each flattened ball in 1 piece of plastic wrap. Place 1 wrapped ball on each piece of foil. Fold foil tightly against ball, making an airtight seal. Store in freezer. Use within 10 months.

Each package is enough dough for one 8- or 9-inch single-crust pie. If you plan to use a 10-inch pie plate, divide the dough into 6, instead of 7 balls.

**To use:** Completely thaw 1 or 2 packages of dough. On a floured pastry cloth or between pieces of

floured plastic wrap, roll out dough to an 11-inch circle. Dough will be quite thin. Fit dough into an 8- or 9-inch pie pan without stretching. Trim and flute edge. For a baked shell, prick bottom and sides with fork tines and bake for 10 to 12 minutes. For unbaked shell, add filling and bake according to filling directions.
